Guided Surgery

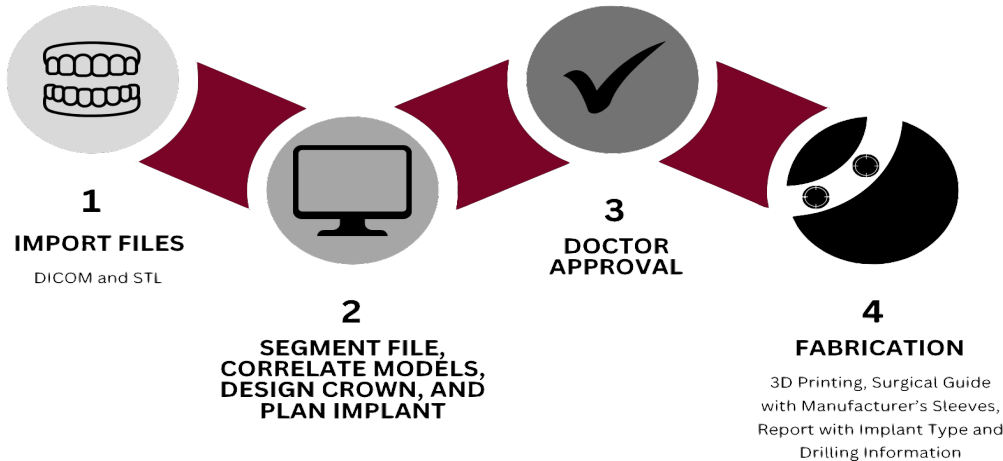

Here to Help Every Step of the Way!

Surgical Planning Made Easy!

With our in-house surgical planning team, we are able to assist in a streamlined implant process. Our team works directly with clinicians and we initiate the design process to produce the needed prosthesis, guide, and report. This workflow allows us to provide a plan for success with predictable implant placement.

Surgical Guide Workflow

What is Needed?

- **DICOM in Raw, DIEDM Format and STL Files**
- **Impressions OR Intraoral Scans**
- **Bite**
- **RX**
